OUR

PHILOSOPHY

“From Heart To Heart”

People don't take trips, trips take people..

We believe that travel is a way of life, a journey in the consciousness of the individual. The one who travels and sees the difference, nature and culture and understands it, loves it and loves simplicity as a way of life, his awareness increases and will have a different vision for life.

Traveling is the human first instinct and his natural behavior, Adventure is not only walking in a valley or camping in a forest, it's more about opening your mind to all possibilities, to accept the existence of different lifestyles, other societies, customs and concepts other than the ones you know.

Accepting that human is part of nature and not the main component of it & we have to live it by traveling & exploring new cultures , natures & traditions. And that all the complexities of contemporary life are illusionary that can be faded by traveling.

We have dedicated our lives to discovery, experiment, learning and continuing education in order to meet our travelers need & satisfaction . We left our tradition life style and traveled and went out to nature to learn simplicity, pure beauty , art & more about people .

It lies in the Jordan Rift Valley, and its main tributary is the Jordan River. The lake's surface is 430.5 metres below sea level, making its shores the lowest land-based elevation on Earth.

NORTH OF JORDAN

The rolling hills of northern Jordan hold some of the loveliest countryside in the whole Middle East, with acres of olive and fig trees, patches of ancient pine forest and fields of wheat interspersed with fertile, cultivated valleys that point the way west down to the deep Jordan Valley. This is the most densely populated part of the country, and every hill and wadi has its village.

MOUNT HAROUN HIKE

Jabal Haroun (Aaron's mountain) is the highest peak in the mountains few kilometres south-west from the ancient city of Petra. It became hidden and unknown after the Crusaders' era for the western world for over 600 years until Johann Ludwig Burckhardt, the Swiss "rediscoverer" of Petra reached the mountain in 1812 but he couldn't make it to the top.

The path begins in the center of Petra next to the Qasr al-Bint heading southwards after the great ruins. It's about 11 km walk to the mountain and an easy ascension followed by a little climbing on steps to the top. The whole by walk can be made about 10 hours and allow as much time on your way back.

ROCK CLIMBING

Wadi Rum). It is full of massive sandstone rock formations, with a near-limitless number of climbing routes, many yet to be discovered. While there is climbing right near Wadi Rum Village, the real reason to visit Wadi Rum is to go deep into the desert to experience the vastness.

Wadi Rum is all about traditional (trad) climbing—where climbers use their own gear to protect from falls before removing it. But for amateurs, there are a few bolted or sport-climbing routes, where anchor points and protection are permanently installed.

The guide for this tours is a bedouin from there with a licence for climbing from ENSA CHAMONIX School for mountain sports.

BURDA MOUNTAIN HIKE

Jabal Burdah is located in the southeast of the protected area. On the north ridge, stands the 35 meter high Burdah rock bridge. It is considered one of the highest natural arches in the world. And one of the most spectacular sites in Wadi Rum.

Hiking and scrambling Jabal Burdah

Different tracks lead to the Burdah rock bridge. Our favorite is the 'Bedouin road' on the north side of the mountain. That is a 2-kilometer hike and scramble, which takes us about 3 hours. It is one of the most rewarding climbs in all of Wadi Rum desert. It is moderately difficult. Of course, we assist you all the way up. And we show you the most beautiful viewpoints. Some of the steep parts require the use of your hands, as well. And some places we might use a rope.
