ABOUT

"We are on a journey of re-introducing outdoor culture with hope for change."

We are an outdoor community that aims to develop and support local tourism by leading weekly social outdoor activities, strengthening our roots with nature, boosting mental, physical, and social health as we surrounding ourselves with like-minded people.

We also provide customized and authentic local experiences & tour design for Jordan visitors.

MISSION

Our mission is to grow the outdoor culture in Jordan and see it thrive, to support and develop local communities for better service levels, and to provide Jordan's visitors with the best experiences along with cultural blending programs, and safe trips!

We wish to spread the awareness of sustainability by connecting people with nature and their environment.

VISION

To be a thriving society aware of the outdoor lifestyle united with its natural and cultural heritage.

OUR STORY

It all started with a dream. . . a dream of exploring the world and its nature and culture. We started this journey on our own, exploring the world with passion and enthusiasm. Eventually we expanded our community-based tourism in Jordan to other destinations around the world, and the journey will never stop!

We built meaningful relationships with local communities through collaborative relationships, and further introduced the local communities to our visitors. We worked closely with these local communities to develop their services and maintain the authenticity of the experience. These relationships are what is helping us achieve our ultimate goal to create change through travel—travel that aids local communities, women, and youth through reaching a global community of travelers and adventurers.

The more we travel, the more we discover and appreciate nature. We become more connected to our surrounding environment when we give back nature to achieve a win-win situation with mother earth through our efforts of sustainable travel & supporting eco-tourism.

For us, relationship bonding is what matters the most. We hate labels and strive to live humbly, grounded and united with nature.

When you join us, you are not just a client or a number in our group! You are a friend, a part of the community, and a part of the change. You will take part in our dream of a better world and join a team to build healthy relationships around the globe.

If you support this mindset,
then our world deserves more like you!

OUR CORE VALUES

A COMMUNITY - THE GLOBAL TRIBE

We share a love of nature and adventure. We achieve our mission through uniting the diverse local communities, strengthening the bridges between Jordan's varied cultures, and maintaining our social health with like-minded groups and that what creates and strengthens a sense of global community. We believe that everyone should feel welcome as a traveler around the world.

OUTDOORS MATTERS

We believe in outdoor transformative power: it boosts mental and physical health, develops more respect for ourselves and our surroundings, being close to nature will make us appreciate being grounded and more connected to earth. Engaging with different cultures and mindsets is the best experience you will ever have, as it has a direct impact on your social health, it gives us the enlightenment of our true blessings and values, and it opens our mind to the world.

WE SHARE OUR EXPERIENCES

We collaborate with partners that complement our strengths and weaknesses, rather than competing. We convene, amplify, and lead rather than dictate—and that is the main drive to the outdoor community growth.

WE INSPIRE THE IDEA OF SUSTAINABILITY

We protect the places we love. Nature and outdoor activities directly engage people with their surroundings— it invites deeper, personal connections with the land, leading to a commitment to care and advocate for its health and preservation.

SAFETY

Safety is always first when we start planning our adventures and activities, starting from something as simple as checking the weather forecast and scouting the trails to the most important of: creating and maintaining a “sense” of feeling safe emotionally, physically, and socially within our community.

TEAM BONDING [CORPORATE]: CORPORATE SERVICES

TEAM BONDING ACTIVITIES

CORPORATE SOCIAL RESPONSIBILITY [activity planning]

MEETINGS & INCENTIVES TOURISM

We came from a corporate environment, we worked with different teams and we established new departments with new teams, it is always going well when establishing a team or when it comes to lifting up the team's performance by working on the team capacity building and staff mobilization, but there is always a "missing link" which is the personal bond, from that point we decided to help organizations bonding their team members, by simply put them all together in a different environment, sometimes a bit out of their "comfort zone."

Monitoring and evaluating the performance of the team after having a day out of the office, performing a total different activities and experience together showed a remarkable change on their personal behavior as a team, which reflects on their performance and productivity as a team.

When it comes to activity planning, CSR, and team bonding we come to the scene, we take the burden of the planning, monitoring and evaluation, so we can let the corporates focus on their core businesses.

Our team is always ready to customize your retreat or team bonding activities as per your requirements and the purpose of the activities, our HR consultants will help you design the needed hour to hour activities to subliminally deliver the importance of the team work, leadership, staff utilization, communication and emotional intelligence skills.

For more information about our customized activities, please contact us. We are ready to serve you.
